

Denver Botanic Gardens
Hardy Fern Foundation Accessions - 2021 Inventory

AccNum	Scientific Name:	LOCATION	Performance (Great, Good, Fair, Poor, Dead)
122035*1	<i>Adiantum x mairisii</i>	GWDMBED2	Alive and doing good.
183486*1	<i>Athyrium vidalii</i>	GOAKCS	Good. Has increased in size about 40% since planted.
183486*2	<i>Athyrium vidalii</i>	GPKGATSTR	Doing well. Has grown in size and is establishing despite being planted in a challenging area.
972021*1	<i>Dryopteris affinis</i> 'Crispa Barnes'	GHSE1	Dead
212427*2	<i>Dryopteris championii</i>	GMHGSOUTH	Received and planted in the late summer/early fall of 2021 in Mile High Garden Shrub Border. Looked healthy into holidays; now covered in snow.
212427*3	<i>Dryopteris championii</i>	HGRH10	Newly received. Alive. To be planted in Oak Grove spring of 2022.
212428*1	<i>Dryopteris cristata</i>	HGRH10	Newly received. Alive. To be planted in Oak Grove spring of 2022.
212428*2	<i>Dryopteris cristata</i>	HGRH10	Newly received. Alive. To be planted in Oak Grove spring of 2022.
212428*3	<i>Dryopteris cristata</i>	HGRH10	Newly received. Alive. To be planted in Oak Grove spring of 2022.
951274*1	<i>Dryopteris cycadina</i>	GHSE1	No longer in this location
212429*1	<i>Dryopteris hondoensis</i> forma <i>rubrisora</i>	GMHGSOUTH	Received and planted in the late summer/early fall of 2021 in Mile High Garden Shrub Border. Looked healthy into holidays; now covered in snow.
183487*1	<i>Dryopteris namegatae</i>	GOAKCE	Great. Has doubled in size since planted.
183487*2	<i>Dryopteris namegatae</i>	GOAKCS	Great. Has doubled in size since planted.
033315*1	<i>Dryopteris tokyoensis</i>	GOAKCS	Great. Has increased in size since planted. Has matured to 25" from crown to tip.
122038*2	<i>Dryopteris wallichiana</i>	GWDMBED2	Doing good. Has matured and is well established.
122038*3	<i>Dryopteris wallichiana</i>	GWDMBED1	Dead
183488*1	<i>Onoclea sensibilis</i>	GOAKCS	Fair. Has not grown much. Will increase water.
183488*2	<i>Onoclea sensibilis</i>	GWDMBED2	Dead. Unfortunately did not come back in 2021. Extreme heat and drought may have played a role in its decline.
183489*1	<i>Phegopteris decursive-pinnata</i>	GOAKNE	Dead. Did not come back after last winter.
183489*2	<i>Phegopteris decursive-pinnata</i>	GPKGATSTR	Doing well. Has grown in size and is establishing despite being planted in a challenging area.
183491*1	<i>Polystichum setiferum</i>	GOAKSW	Great. Has more than doubled in size since planted.
951275*1	<i>Polystichum setiferum</i>	GHSE1	Alive but not thriving due to current soil conditions. Working on amending.
972022*1	<i>Polystichum setiferum</i>	GHSE1	Alive but not thriving due to current soil conditions. Working on amending.
122039*1	<i>Woodwardia unigemmata</i>	GWDMBED2	Dead
